

Hillary vs Trump, Open Letter to New Hampshire Doctors (11/3/2016)

If Hillary Clinton is elected on Tuesday, we may as well begin phasing ourselves out of business, or maybe I should say, enter the final stages of closing our small healthcare practices/businesses. She will bless the continued criminal behavior of Medicare and their contractors, such as National Government Service (NGS, owned by Anthem). See my site www.StopAnthem.com for the facts. She will put the government agencies back to work writing rules and regulations like Obama did at the the beginning of his tenure, when he gave us Electronic Health Records (EHR), PQRS, and penalties on Medicare payments. Oh, do you remember HIPAA, spearheaded by Hillary, and signed into law by Bill, in the mid 90's. How much has that cost you? Google, Facebook, and Apple are far bigger threats to you and your patients when it comes to privacy. HIPAA, EHR, PQRS, Obama-care, and all the soon-to-be-announced Hillary Programs are literally destroying our ability to get good healthcare in America. I just met a flight instructor who told me he is moving from Georgia, USA to New Zealand, and the main reason is a comparable job but much better healthcare for his family. Another 63 year old man said his Obamacare cost was doubling, so he was dropping it and would pay the penalty.

If you vote in New Hampshire this Tuesday, your vote will be infinitely more powerful than someone who lives in a state like California (if you lived in CA, your vote would be worthless). Tiny New Hampshire's four Electoral Votes may be the key to whether Hillary or Trump take office. If you don't vote in this election, you may be ending the quality of life that all of us have enjoyed over our lifetimes. If you are voting on someone's personality instead of their platform, you could be accused of acting like a 12 year old child. Adults will vote the platform, not the personality.

I used to be opposed to Trump, but I now know his platform. I also know Hillary's platform (basically organized crime). If you are listening to the "main stream media" (MSM), and basing your voting on your emotional responses, then you owe it to yourself to do some quick catch-up to put things in context, which the MSM is careful to not do. Just check out www.DrudgeReport.com.

I have spent the past five years pushing back on Medicare and NGS for violating section 1175 of the Social Security Act, and I even have a letter written by Anthem's NGS and sent to U.S. Senator Jeanne Shaheen from NH that references me and my complaint. The senator's staff told me that I had a valid complaint, and NGS's behavior did not smell right. In the end the situation was resolved when Anthem (NGS) donated \$2000 to the senator, and the senator's office refused to answer my enquiries. When Donald Trump says he is funding his own campaign, and he will not be bought off by the special interests (like Anthem), that means a lot to me.

If Hillary becomes president, it will be useless, and even dangerous, for me to complain to Medicare. Instead I will have to resign to becoming one of their good slaves – do you really want to join me?

I am not asking you to vote for Trump, I am begging you. He may act like a 12 year old at times, but I hope you won't act like a 12 year old on Tuesday.

P. S. A Hillary supporter just stole the Trump sign right off my lawn. He's just following her example.
